

Attention: Deanna Cambridge,

My name is Lane Ebel and have property at [REDACTED]

[REDACTED] I have received a letter from Parkland County that Empire Iron works would like to change from CR- country residential to RIC- Rural Industrial District.

We **do not** support this change in any way. Our community is a safe, quiet place for our children to be raised in, we know everyone in the community. Our concerns are that the noise pollution, which is bad now, will get worse. Also the environmental impact on our community is unknown. What, if any, negative effects could wildlife be subject to if the operation goes ahead with expansion plans? What are the risks to the lake and the local community's water supply?

The safety of our children is also a question as we will have more trucks and strangers coming and going out of our community and the roads in our community will be destroyed by the larger equipment.

We find the fact that Empire Iron Works is present in our neighborhood at all is surprising, as it is entirely out of place for one of the most beautiful communities and lakes in central Alberta.

I hope that Parkland county council can understand the residents' concerns and not be blinded by what appears to be corporate greed.

I request that council members receive a copy of this letter as I will not have a presentation at the public hearing, however I will be in attendance.

Thank you,
Lane Ebel
