To the Director of Engineering Services,

I am writing to you to request street lighting to be installed in the communities of Moonlight Bay and Wabamun Beach. Our communities have been hit severely over the past 6 years with crime, so much so that we are one of the number one hit places in parkland county. Our area is so black at night that you could not see someone walking down the street 15' in front of you. We have had parkland enforcement and rcmp out here almost every week if not more due to a break ins and we are not that big of a community. Parkland enforcement has done meetings, property assessments and neighbours are doing all they can to eliminate the risks yet we still keep getting hit. Parkland enforcement [REDACTED] in the fall did a risk assessment of the area at our request and it was suggested and he [REDACTED] ea. Attached is that plan. I put it forward to the whole community and everyone is in favour of this. We hope that this will make our area less enjoyable for thieves. John McNabb our counsellor and mls Shane Getson are aware of this situation and recognize our area is in desperate need of help from criminal activity. The sooner this happens the easier and hopefully the result will be less anxiety for people in our area and less criminal activity.

On a further note we are also looking into having cameras placed at the three entrances into our are for rcmp/parkland enforcement to have full access to as this is a very close community and we know who belongs in our area and who does not. We would welcome being a test community for this kind of support to the rcmp in catching criminals.

Please let me know anything else you need from our community to make this become a reality.

yours sincerely,

[REDACTED]
