

October 25, 2012

Mr. Pat Vincent, Chief Administrative Officer
Parkland County
53109A SH779
Parkland County, AB T7Z 1R1

Dear Mr. Vincent;

RE: 2011 Renewable Energy Certificates (REC)

On behalf of the AMSC, thank you for your commitment to the AMSC Energy Program. We would like to recognize your dedication to the environment with your decision to purchase of green power in the 2009+ AMSC Energy Program. Enclosed you will find your Renewable Energy Certificate (REC) acknowledging your renewable energy purchase for January to December 2011.

TransAlta provides Green Power to the AMSC Energy Program by means of Renewable Energy Certificates (RECs) that are EcoLogo certified. These certificates entitle you to all the rights, title, interest and benefits resulting from the actual (or assumed) displacement of emissions through electricity production at a green power facility. RECs are produced in Alberta from Canadian Hydro Developers or Vision Quest, which is TransAlta's Wind Business, and purchased as a percentage of your total annual electricity consumption as part of the 2009+ AMSC Energy Program.

The **Parkland County's** purchase of **522.75 MWh** of green power has contributed to the reduction of **460.02** tonnes of carbon dioxide, which is similar to taking **90** cars off the road for one year or planting **11,776** trees. Your choice has offset a significant amount of the greenhouse gases produced while generating your electricity; thank you!

With your 2009+ Energy Aggregation Program approaching the end of its term on December 31, 2013, AMSC will have an enhanced 2014+ AMSC Energy Program which will continue to be an environmentally responsible, transparent and flexible program in which you will again have the option to acquire green power.

For further information regarding the 2009+ AMSC Energy Program, or to learn more about our enhanced 2014+ AMSC Energy Program, please contact Andrew Riley at 780-431-4541 or ariley@auma.ca.

Thank you for supporting the AMSC Energy Program.

Yours Truly,

John McGowan
Chief Executive Officer

Green Energy® Tags from TransAlta Corporation or its affiliate Canadian Hydro Developers, Inc is a renewable certificate product. Every MWh of Green Energy Tags from TransAlta Corporation or its affiliate is a tradeable renewable certificate product.

This certifies that Parkland County is entitled to the full ownership of all environmental attributes associated with 522.75 MWh of tradeable renewable certificates free of any liens and encumbrances for the period of January 1, 2011 to December 31, 2011.

VP, Regulatory & Commercial

Date September 10, 2012

Certified Renewable Low-Impact
Electricity: CCD-003

Transfer of full ownership of all environmental attributes associated with the generation of 522.75 MWh from facilities that are certified through the EcoLogo™ Program.
