Vision Statement

We are striving to protect our community,
enhancing and building it for the future

Committee On Keephills Environment

We are striving to protect our community, enhancing and building it for the future

What is the business of COKE?

- We promote fairness and accountability between industry, government and local stakeholders.
- We are a voice representing individuals and Organizations within the Community

Committee On Keephills Environment

We are striving to protect our community, enhancing and building it for the future

How does COKE fulfill its function?

- Participation in the Keephills Power Plant Steering Committee.
- Identification of local issues through consultation programs and lobbying on Stakeholders behalf
- With an eye to the future growth of the community
- Proactive approach
- Promoting public awareness

COKE's Mission Statement:

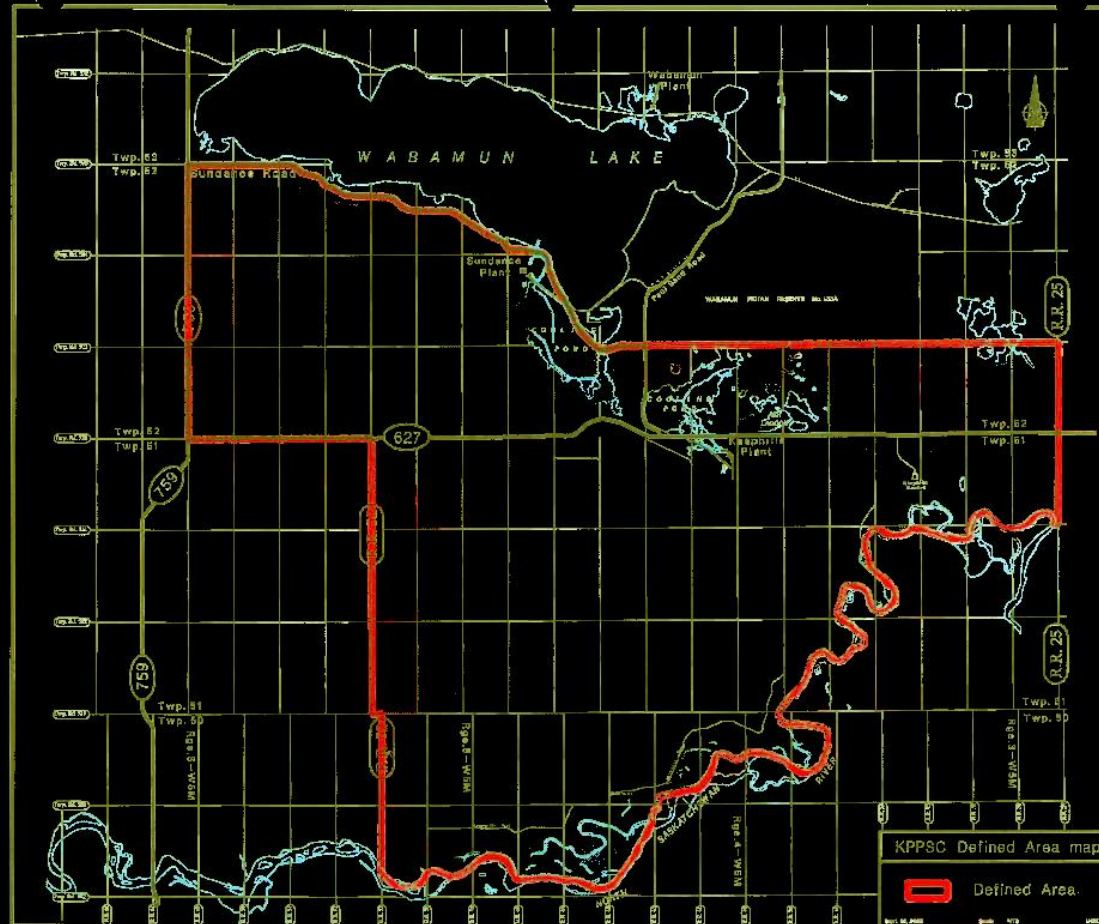

We provide the opportunity for Stakeholders to identify issues related to industrial growth in the area from SH 759 to SH 770 and from the North Saskatchewan River to Lake Wabamun. We are a conduit between individuals, organizations and the community promoting fairness and accountability between industry, government and stakeholders. We are concerned with potential industry or regulatory impact on the future growth of our community. We work through public awareness and consultation programs identifying local issues and lobbying on the behalf of others.

Committee On Keephills Environment

We are striving to protect our community, enhancing and building it for the future

Summary

- COKE was created 35 years ago to deal with TransAlta
- We want to be a part of updating the ASP
- We want the infrastructure re-established throughout the mine area (over 31,000 acres).
- We want to ensure our community remains in existence
- We want to encourage people to re-populate our community.
