- E Materials donated at fair market value

**PROJECT TITLE:** Hycrest Place Community Association  
Relocate and rebuild skating rink

**INTRODUCTION:** We would like to relocate and rebuild our skating rink as it is a fair distance from the entrance to the park area. Flooding was done by pump from the slough but it was a fair uphill climb and people find it too difficult to flood.

We did downsize once already and put a pavement base but contractor did not do as he said he would for thickness of pavement and it was very uneven throughout and very quickly trees were starting to push through. We did file a small debts claim but the company had gone into receivership.

Some subdivision residents started to clean off a spot on the slough and of course the committee did not feel that that was a very safe idea.

We have worked a recent casino to help with the project costs and of course cannot do it on our own. We do have a skate shack that can be moved over closer to the road and we have power there as well for lighting.

**THE PROJECT:** Relocate and rebuild an 80 x 60 skating rink, put down a pavement base so it can also be used for tennis, volleyball and basketball to help keep children entertained. We do have the equipment for these sports to install but did not install as the indications at the rink did not look good.

**PROJECT JUSTIFICATION:** We are interested in having a gathering spot and activity for subdivision residents to meet and do things to improve community spirit.

**PROGRAM REQUIREMENTS:** Site preparation; build new rink and dismantle old rink

Subdivision volunteers and equipment would set up initial base with guidance from the pavers. Possibly Parkland County would be able to assist in this preparation.

**SITE FACTORS:** Relocation of rink would have to be approved by Parkland Count as the Lessor.

**FINANCIAL RESOURCES:** We have worked a recent casino to help fund such a large project but cannot do it on our own.

**APPROVALS REQUIRED:** Require Alberta Gaming and Liquor Control Board and Parkland County as the Lessor.

**IMPLEMENTATION RESPONSIBILITIES:** Brian Lembicz, as Community League representative. Parkland County can have a role in the project but they would have to advise us how they can help.

**PROPOSED SCHEDULE:** Summer to fall 2015

**SUSTAINABILITY PLAN:** We understand and have seen advertisements for water hauling businesses within Parkland County that they do flooding of skating rinks. We would have to obtain subdivision residents to blade and snow blow to keep ice clean and set up a schedule accordingly. There is a control for the lighting so it can be turned on & off at reasonable times to obtain maximum use of the rink.

**COMMITTEE MEMBERS:** Please see list attached.

# **HYCREST PLACE COMMUNITY ASSOCIATION**

## **2015 ANNUAL GENERAL MEETING**

**February 9, 2015 at the Lembicz residence**

**PRESENT:** Frieda Lembicz      Mike Feth      Chris Slepanki  
              Brian Lembicz      Janine Garley      Katie Lucier

The meeting was called to order at 7:10 PM.

The Minutes of the 2014 AGM were supplied to everyone.

Janine moved that the minutes be adopted as read. Chris seconded.

Carried

### **BUSINESS Arising from the Minutes:**

- Red shale pit is apparently closing down. Frieda will investigate to see if we can possibly get a load hauled into ball diamond for future consumption.

Frieda

- Weeds were sprayed and sand worked up in the spring and weeds were sprayed again in the fall. Has Parkland County inspected since last notice. Brian advised that we will need to purchase more Par 3 spray.

Frieda/Brian

- New cultivator requires some maintenance as the blades start rotating therefore immediate move forward.

Brian

- Cement pad, picnic tables and electrical work in storage building were completed as planned. Could not cement fire pit area as there seems to be some sort of water table in that location as when trying to prepare the area for the cement the ground was constantly saturated and water kept moving in. Thanks to Dwayne for overlooking and completing this project.

-Frieda acknowledged a "Thank You" to Mike and Brian for cleaning up the playground area. She also acknowledged Dwayne and Sheldon Slepanki, John Garley and Brian for maintaining the grass at the ball diamond and park area.

### **NEW BUSINESS:**

1. Financial report was presented:

**General account** as of December 31, 2014 balance - \$17,373.66.

**Casino account** as of December 31, 2014 balance - \$31,824.60.

2. Nominations held for 2015 executive positions:

President	Frieda Lembicz
Vice president	Mike Feth
Secretary/Treasurer	Kelly Feth
Directors	Chris Slepanki (Casino Director)
	Dwayne Slepanki
	Brian Lembicz
	Janine Garley

Katie Lucier has agreed to become a Director on the Association.

3. Frieda advised everyone of progress on the grant application to Parkland County for relocating and building a new skating rink. We are waiting for some quotes and we also have to canvas sub-division for approval and may have to hold off till June 15, 2015 grant deadline.  
Janine moved we use our proceeds from the Parkland County operating grant and casino funds to relocate and rebuild skating rink closer to parking lot to obtain maximum use with a budget amount of \$66,000.00 with the Community League applying for a Major Sustainability Grant from Parkland County and also applying for a Community Facility Enhancement Program (CFEP) before the March 15 deadline. Mike seconded. Carried
4. Frieda also advised that Cindy Davies from Parkland County, Parks and Recreation had supplied a website link for Canadian Heritage that supplies Celebration and Commemoration Program Funding for Canada Day events. Frieda did complete an application for \$3870 that had to be submitted by January 15, 2015.  
There was discussion as to whether or not we do it the evening of June 30<sup>th</sup> as then attendees can stay later into the evening to obtain full results of the fireworks. July 1<sup>st</sup> would then make it difficult as people would return to work the next day. Will monitor and discuss with residents Frieda/All
5. Events for 2015:  
May 23/24 – Park Clean-up  
June 30/July 1 – Canada Day  
August 15 – Get together in the park – “Get to Know Your Neighbor”  
September 19 – Chili Corn Roast  
December 6 – Christmas Activity
6. The Executive was in favour of publishing a “Newsletter” and distribute by the end of April to all residents in subdivision to make them aware that a Community League does exist within and include all events that we have planned. This contact with residents we will get feedback as to how we can get in touch with them to remind them of the events. Chris
7. Janine has offered to develop a website so that we can let residents know that they can go on line to obtain info on the events or contact us for any further information. Janine

Next meeting – April 19<sup>th</sup>, 2015 to organize “Newsletter” and distribution to residents.

Dwayne moved the meeting be adjourned at 9:00 PM. Kelly seconded.

## Brian & Frieda Lembicz

---

**From:** Sandra Dexter <Sandra.Dexter@aglc.ca>  
**Sent:** January 23, 2015 1:03 PM  
**To:** 'Brian & Frieda Lembicz'  
**Subject:** RE: Hycrest Place Community Association

Good afternoon Frieda,

If you look at the approved Facility/Equipment 100% code you will see that the code is under the approved use of proceeds and the expiry date is for December 31 2037 as per the information in the lease we received from the group. It also says the group is responsible for the following:

taxes, all utilities, maintenance, repair, operation of building, playground, ball diamonds, washroom, skating rink, rink shack, horseshoe pits, fire pit area, parking area and trails. Again this is contained in the lease agreement. This is what has been approved.

Regards

Sandra Dexter

# DASHER BOARD SYSTEMS

## SYSTEM 240 OUTDOOR

Direct exposure to sunlight and extreme temperature variations combine to create very tough demands on an outdoor dasher system. This system is designed to look like the dashers found in your community arena, but the use of specialized frame construction, custom blended plastics, and unique material sizing and fastening methods provides a dasher system that outperforms our competitors. Make your outdoor rink a community focal point and a multi-seasonal activity center with a new outdoor system.

Outdoor dasher systems (like our System 240, shown on page 32) have always been a popular sports facility in our northern climate, and provide some unique design challenges that require specific attention.

As with indoor systems, more communities are choosing to install factory built steel framed dashers with plastic playing surfaces instead of the old style wood post and plywood "boards". The new factory built systems are quick to install, much more durable, more vandal-resistant, and require less maintenance.

Because outdoor rinks are now being used for many different non-ice summer activities, they can be removed to allow the surface to be utilized in other ways during the summer months. In the event of damage, pieces or complete sections can easily be replaced.

As conventional puckboard may buckle and crack when exposed to direct sunlight, or contract and become fragile and brittle in cold temperatures, we use a HDPE material known as "TPO". This product has been specially formulated for use in extreme outdoor conditions. It is U.V. resistant, and in comparison to conventional plastics allows for less expansion and contraction, does not become as brittle during extreme cold, and is ten times more resistant to cracking.

Dasher frames need to be designed to take the extra abuse that being outdoors provides. The frames should be hot dip galvanized to prevent rusting, and be specially built to allow the TPO to "move" on the structure.

Puck containment systems are typically a chain link fencing material set on the dasher sill with the chain link post support mounted through the sill and to the lower dasher frame.

Outdoor dasher systems are often built in conjunction with community concessions, change room and fire pits. With some preplanning, they can become a long lasting and valuable all-season addition to your community's recreation and wellness.

# DASHER BOARD SYSTEMS

## SYSTEM 240

Popular, durable and lightweight 5" steel-framed system that can be customized to include specialized features for in-line, outdoor rinks, and regular indoor arenas. Easy assembly makes this system ideal for installation by community volunteer labor. Designed for use with tempered glass or acrylic shielding, or chain link puck containment.

## SYSTEM 240 INDOOR

Highly flexible design withstands the impact of the skater and can be installed with conventional or back stepped anchoring to allow for use with any type of skating surface or floor.

## SYSTEM 240 INDOOR

Preferred by some customers for its smaller frame, the indoor model of our System 240 can be built to include specialized features that allow for more controlled expansion and contraction. Highly durable, portable and forgiving to player impact.

### OUTDOOR DASHER SYSTEM

OMNI Sport is pleased to provide you with the following price quotation for your requirements for an outdoor dasher system for the Hycrest Place Community. Our price quotation is as follows:

To supply and install an OMNI Sport Prolite system for an outdoor rink 80' x60' x 5' radius. The scope of our price quotation includes the following:

- 276 lineal feet of 48" high, aluminum Prolite 2" dasher system.
- .375" white TPO cladding, .375" colored TPO sill plate, 8" x .375" TPO colored kick strip.
- 2 access gates all with wear resistant latches, hinges, and 1" HDPE thresholds.
- 1 machine gate equipped with heavy duty adjustable hinges, double self contained sliding closure bars and steel plastic covered threshold.
- Official line marking s with color matched zinc plated fasteners.
- Computer designed OMNI Sport shop drawings.
- Gusset system with anchor pins as required.
- 2 year standard warranty, extended warranties are available.
- Complete installation by OMNI Sport installation technicians.
