Parkland County, AB T7Z 1R1

Dear Ken:

As per our discussion around the replacement of the Evansburg Fire Station, and the response model being developed, I would like to provide the following information.

We propose the following project for the 2016 budget year, based on current planning for the Yellowhead County:

1. Evansburg Fire Station Replacement - \$6,500,000.00

This project will see the current fire station that is over 40 years old be torn down, The vehicles currently being stored in the station will be placed in a Yellowhead County building in Evansburg until construction has been completed. The new fire station will be built with a 50 year life expectancy on the current site.

This project total is \$6,500,000.00 and we are looking for 50% capital funding for the project. Please note as the completion of the facility build would not be until late 2017 payment would not be required until then for this project.

Please consider this project and advise if you support these initiatives.

Thanks for taking the time to come to the Evansburg Station and engaging in productive discussions.

Regards,

Albert Bahri
Director of Protective Services

Cc: Fire Chief Jim Phelan
