

**Energy** for Alberta  
2009+ Energy Aggregation Program

May 1, 2012

Pat Vincent, Chief Administrative Officer  
Parkland County  
53109A SH779  
Parkland County, AB T7Z 1R1

Dear Pat Vincent;

**RE: 2010 Renewable Energy Certificates (REC)**

On behalf of the AMSC, thank you for your commitment to the AMSC Energy Program. We would like to recognize your dedication to the environment with your purchase of green power in the 2009+ AMSC Energy Program. Enclosed you will find your Renewable Energy Certificate (REC) acknowledging your renewable energy purchase for January to December 2010.

The **Parkland County's** purchase of **506,005 kWh** of green power has contributed to the reduction of **445 tonnes** of carbon dioxide, which is similar to taking **87 cars** off the road for one year or planting **11,399 trees**.

Green Power is an optional product offering in AMSC's 2009+ Energy Aggregation Program. Municipalities can choose the level of green and green credits will accrue to the purchasing municipality. With this product, your municipality can:

- Add Green Power at any time;
- Purchase annual fixed volumes or by percentage of total consumption;
- Vary the volumes by year and grow gradually;
- Assign Green Power to a specific site(s);
- Buy Green Power from the AMSC even if your electricity contract is with an energy retailer outside of AMSC's program.

For further information regarding the AMSC 2009+ Energy Aggregation Program, please contact Brian Jackowich, Senior Director, Energy and New Services by telephone at (780) 409-4316 or email at [bjackowich@auma.ab.ca](mailto:bjackowich@auma.ab.ca).

Thank you for supporting the AMSC Energy Program.

Yours Truly,

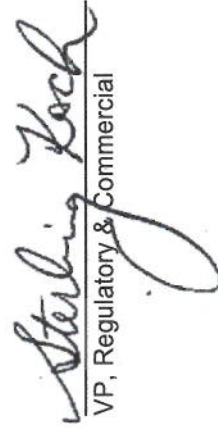

John McGowan  
Chief Executive Officer

Green Energy® Tags from TransAlta Corporation or its affiliate Canadian Hydro Developers, Inc is a renewable certificate product. Every MWh of Green Energy Tags from TransAlta Corporation or its affiliate is a tradeable renewable certificate product.

This certifies that Parkland County is entitled to the full ownership of all environmental attributes associated with 506,005 kWh of tradeable renewable certificates free of any liens and encumbrances for the period of

January 1, 2010 to December 31, 2010.
