**Subject:** Pinnacle Pellet Plant

Being a resident of Entwistle, my wife and I are concerned about the approval of the Pinnacle Pellet plant. We feel that not only will the value of our property decrease, the increased traffic on Hwy # 16 and Hwy #22 interchange will cause lots of problems, for the residents to access them safely, with 70 - 90 large trucks daily. The noise level will be increased immensely, as the truckers already "love" their jake-brakes through this area. The traffic will also disrupt the school zone and residential areas. Plus the product (sawdust, chips, etc) that will be used are already being used for power produced in Drayton Valley and Whitecourt, just to name two. As far as employment is concerned, there will not be enough to encourage growth in our area. Thank you.
