PRELIMINARY 3D CONCEPTS

Site Context

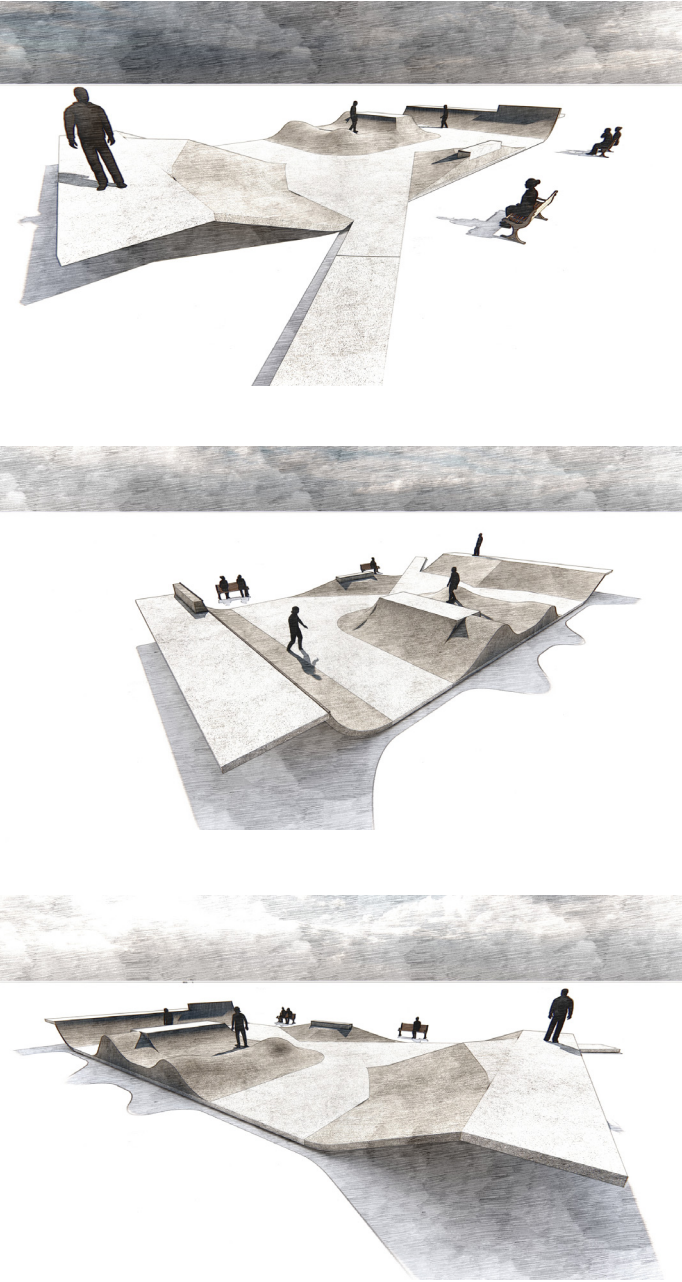

This preliminary 3D Option is based on feedback from the community received during an online workshop and survey. The results of the survey have shown a clear direction towards transition style features. Option 1 offers many different transition features, both classic and street style. Whether you would prefer the mini ramp/hip style, organic flow, or flowing street features, this park has it! Ranging in heights from under 2' to over 5', Option 1 has something for everyone, regardless of skill level.

3D Concept Option 1:

- A - 4' Mini Ramp
- B - 5'6" Extension
- C - Banked Hip with Ledge

- D - Organic Flow Transition with Rollers
- E - 4' Turn Around Bank with Hip

PRELIMINARY 3D CONCEPTS

Site Context

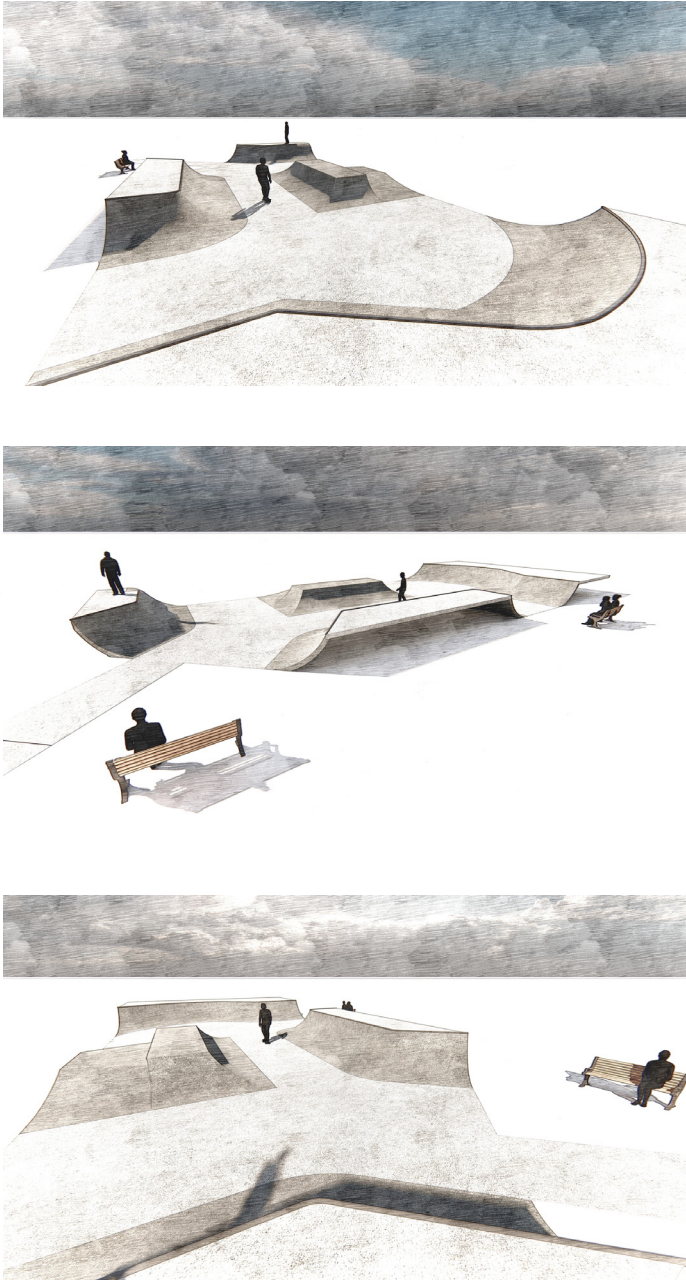

This preliminary 3D Option is based on feedback from the community received during an online workshop and survey. The results of the survey have shown a clear direction towards transition style features. Option 2 is using the “less is more” principal and has multiple mini ramp style features. What it lacks in variety, it makes up for with the endless lines. No matter where you start or the direction of travel, the rider will be heading towards a feature and redirected smoothly towards another.

3D Concept Option 2:

- A - 4' Quarter Pipe + Hip
- B - 4' Roll-in
- C - Fun Box Feature

- D - 3' Transitioned Box with Concrete Edging
- E - 4' Turn Around Quarter Pipe

PRELIMINARY 3D CONCEPTS

Site Context

This preliminary 3D Option is based on feedback from the community received during an online workshop and survey. The results of the survey have shown a clear direction towards transition style features. Option 3 uses a symmetrical theme, dividing the skatespot into two. One side being transition with clean, straight lines. While the other side uses angles to create street style transition features. Separating these two halves is an organic flow area with lots of elevation change and smooth rollers.

3D Concept Option 3:

- A - 4' Transition Hip
- B - 4' Mini Ramp with Pockets
- C - Organic Flow with Rollers
- D - 3' Banked Pocket
- E - 3' Bank to Curb
- F - 3' Banked Hip
- G - Flat Ledge
